PREFACE

THE collection now offered for sale was begun over fifteen years ago. The owners, both retired educationalists, have been inspired in its formation in recent years by their son, W. James Noble, a well known collector in Australia. It contains specimens from various sources including older Australian and New Zealand collections and though many of the coins have not been on the market for many years, most of them probably emanated from London at some time or other. It is gratifying that these particular coins should be offered to the public once again from London.

The collection of ancient Greek and Roman coins is essentially of a general character covering most periods and areas, while the English hammered collection is more comprehensive and is quite the finest yet formed in Australia. Some of the classical and choicest Anglo-Saxon coins have been in Australia for at least forty years. Details of provenances have been confined to the recognised English collections and sales, however details of provenance on any coin can be supplied upon request. Yet it is not out of place to mention that some of the coins come from comparable collections formed in the past in Australia and New Zealand, such as those of the late A. B. Triggs (catalogue published by Spink in 1924; English, etc. auctioned, Sydney 1945; classical coins bequested to the Nicholson Museum, University of Sydney, in 1936, after his death); of the late Sir R. Marcus Clark (auctioned, Sydney, 1954; main portion sold in Melbourne, 1968); of the late W. D. Ferguson of Wellington, New Zealand; and of the late E. Wills of Sydney, whose collection of extremely fine English coins was mainly bought from London in the 1917-1930 period (later privately dispersed).

The more interesting coins include the rare tetradrachm by Eukleidas (the majority of the ten specimens recorded by Tudeer are now in public collections); the early coins of Attica; the Lydian electrum third stater; the series of Aes Grave; the gold "thrymsa"; the pennies of Cuthred, Offa, Edward the Elder church-tower type, the N. W. mint issues of Eadmund (Wilsig-unpublished moneyer for this reign), Eadred and Eadwig; the Lincoln mint penny of Edward the Martyr; the Richard II noble (believed to be a find piece that has not been on the market before); several of the later gold coins and silver crowns; a few of the Charles I provincial mint issues, and the Charles II unite by Simon. It can be noted that many die variations and identities have been recorded, but are only published in this catalogue in cases where it was felt important for reference.

The cataloguers would like to acknowledge the important contribution of W. James Noble, B.Ec., (Sydney University) to the preparation of this catalogue. This sale shows the scope of the possibilities still available in forming a comprehensive collection of coins and the owners hope that the enjoyment that they received from forming it will now be passed on to many new collectors.

Sale Catalogues

On the average we issue twelve or more Coin Catalogues and three Naval & Military Medal Catalogues each year, some of which are usually of sales of important Collections.

Catalogue Subscriptions

Sale Catalogues, frequently illustrated, are normally posted to Subscribers about three weeks prior to the date of Sale.

Lists of 'Prices Realised' are issued after each Sale, thus giving at a glance a reliable guide to value. The final test of value must always be auction prices rather than the figures given in books of reference, for changing times and fashions soon render the latter obsolete and misleading. The Lists of 'Prices Realised' will probably be enclosed in a following Sale Catalogue.

Air Mail Postage

To allow subscribers resident outside Europe time to submit Postal Bids, Sale Catalogues will, if desired, be sent by Air Mail. Air Mail postage is not, however, included in the Subscription Rate and the cost must be borne by the Subscriber. In such cases a deposit against the cost is required.
